

Applying Racial Justice and Equity Frameworks to Science & Advocacy

In October 2021, [Dr. Jalonne White-Newsome](#), CEO and Founder of [Empowering A Green Environment & Economy, L.L.C.](#), created and led a workshop for the Environmental Protection Network (EPN) and the Union of Concerned Scientists to examine some of the challenges, successes, and lessons learned from our respective capacity-building technical assistance and community work and explore how we can further apply justice-based frameworks in our work moving forward. Dr. White-Newsome has generously given us permission to use excerpts from her training to both replicate her webinar and allow us to share these videos and materials (see below) with you to view on your own time.

In addition to utilizing the materials below, EPN will host additional interactive workshops on a rolling basis. If you have any questions about the links below or future workshops, please contact Kya Williams, Community Outreach & Development Associate at the Environmental Protection Network, at kya.williams@environmentalprotectionnetwork.org.

Video Excerpts from Dr. White-Newsome's Training:

- [Objectives & Intentions](#) (13 minutes)
- [Real Life Examples: Interview with EPN Member John Bachmann](#) (8 minutes)
- [Principles & Existing Practices](#) (4.5 minutes)
- [Relationship-Driven Research and Policy Process](#) (10 minutes)

Additional Materials:

- [Jemez Principles for Democratic Organizing](#)
- [Principles of Environmental Justice](#)
