

EPA EJPCS Logic Model Template

[NOTES:

- All of the unhighlighted text in the table is sample text, but it is recommended that you leave as is for capacity building projects. Any changes in the nature of the project should be reflected here in activities and outputs, and may require budget changes.
- Whatever the deliverables are in the proposals should be included here as outputs
- Long-term outcomes depend on the environmental issue involved. This table features a “decrease in number of asthma-related hospital visits,” for an air pollution capacity-building project, but this would need to be changed for climate resilience projects, e.g., “Increased ability to prepare for and recover from floods”]

Resources/inputs	Activities	Outputs	Audience	Short-term Outcomes (6-12 months)	Intermediate Outcomes (12-24 months)	Long-term Outcomes (2+ years)
Staff time	Identify existing or potential leaders among residents in the community.	5 community leaders, trained and supported.	Community leaders	Increase in # of residents aware of issues in community (target = 100 residents)	Increase in # of stakeholders participating in efforts to address community issues (target = 2 govt. partners, 2 local nonprofits and 1 university).	Implementation funding identified and then secured to address community issues.
In-kind expert contributions		8 meetings with the project steering group on a quarterly basis.	Local residents			
Volunteers	Equip leaders with technology, information, and provide stipends.		City, state, & local governments.	Increase in # of residents committed to help solve the issues (target = 50 residents)		Ordinance and policies proposed and enacted by the local govt.
Partner expertise		100 residents reached through door-to-door outreach	Other identified experts/partners.		Increase in # of community leaders trained and ready to support implementation (target = 5)	
Stakeholder expertise	Identify other stakeholders that might have an interest in this work (e.g.in government and universities)	50 residents provide support and input	Other community leaders nationally through the A2 peer-to-peer learning cohort.	Increase in # of local stakeholders committed to project and addressing community’s issues (target = 1 govt. partners, 1 local nonprofit and 1 university)		
Facilities		One set of maps outlining threats and opportunities.	State and federal agencies and partners.		Increase in # of CBOs nationally, learning from the project (target = 40).	
Trust and contact lists of residents (emails/phone)	Establish a project steering group to include partners, stakeholders and community leaders.	One action plan and one brochure summarizing the project findings and next steps.			Increase in # of national stakeholders	
Social media following	Identify other plans or projects relevant to the work.					
Media relationships						
[If CBO has land/property to use in project, include here]						

	<p>Conduct door knocking to engage residents.</p> <p>Undertake data gathering, mapping and analysis. Host two workshops for residents to determine the need, goals, vision and plan of action.</p> <p>Prepare an action plan (report & summary brochures) based on the findings.</p> <p>Distribute materials (door-to-door mailings and in-person and virtual presentations.)</p>	<p>100 residents receive brochures</p> <p>One presentation to leaders of community-based organizations (CBOs) nationally.</p> <p>One presentation to national stakeholders.</p>			learning about project (target = 20)
